

TekPinoy.biz #20: Hair Shampoo Formulation

Matuto at kumita! Process, machines, wealth

Have you ever wondered how you can reach financial freedom in spite of the COVID-19 pandemic?

If you are out of a job or desiring to leave one and feeling cooped up at home, there is a flavorful, easy way out.

"*Kitang-Kita Na sa TekPinoy.biz Series of ITDI*" is the turn of the year learning tool for you. Let the Industrial Technology Development Institute (DOST-ITDI) teach you 55 simple and cheap ways to prepare meat, fish, fruits, and vegetables. For the manly type - muscle up with 14 machine-based technologies.

Below is TekPinoy.biz #20: Hair Shampoo Formulation.

Keep hair clean, healthy with ITDI shampoo

Did you know that shampoo is probably the most bought hair care product in the world?

More interestingly with proper equipment and chemicals, you could ~~actually~~ formulate your ~~own~~ shampoo instead of buying from the store.

Hair shampoo is considered a special cleanser for hair and scalp. It is a detergent solution modified with certain additives to make it easier to apply and better protect hair when rinsed off.

Compared to soaps, synthetic, detergent-based shampoos can withstand hard water and leave no scum-like residues.

At ITDI, a formulation for hair shampoo is available and comes in two variants, namely, transparent and pearlized.

More interested in rich, oil-based shampoos? ITDI has also developed a shampoo enriched with virgin coconut oil or VCO. Relatively new, the formulation is especially attractive to enthusiasts of new products.
