

ITDI Director Briones joins ranks of 2021 Asian Scientist 100

Once again ITDI Director Dr. Annabelle V. Briones brought honor to DOST and the Philippines with her joining the ranks of the 2021 Edition Asian Scientist 100.

She received the recognition for designing a mosquito ovicidal/larvicidal trap system aimed at reducing population of second-generation dengue mosquitos in the country. She also received the 2020 Gregorio Y. Zara Award for Applied Science Research last year for the same project.

The 2021 Edition listing named Dr. Briones as one of eight Filipino scientists honored by the Asian Scientist Magazine. It placed her along other scientists from China, India, Malaysia, Singapore, Japan, South Korea, Bangladesh, Hong Kong SAR, Sri Lanka, Indonesia, Thailand, and Vietnam - scientists who made a difference amidst the COVID-19 pandemic.

ITDI congratulates Dr. Annabelle V. Briones for being one of the country's esteemed scientists!
