

DOST-ITDI becomes one of the esteemed partners of Shimadzu Philippines

After the Industrial Technology Development Institute of the Department of Science and Technology (DOST-ITDI), Shimadzu Philippines Corporation (SPC), and Shimadzu Asia-Pacific Pte. Ltd (SAP) sealed their fruitful and continuous partnership with a Memorandum of Agreement (MOA) in December 2023, this milestone paved the way for DOST-ITDI's recognition as one of SPC's esteemed partners during the company's "A Toast for Excellence" held at the Grand Hyatt Manila last July 11, 2024.

ITDI Director Dr. Annabelle V. Briones received the award with Ms. Floridel Loberiano, OIC of the Packaging Technology Division (PTD), and Mr. Elyson Encarnacion, Head of the Packaging Safety Laboratory (PSL).

The completed collaborative research studies were published in a scientific journal in April 2024 and were presented at an international convention on July 22-24, 2024.

The SPC is a subsidiary of Shimadzu Corporation, a prestigious Japanese multinational organization known worldwide for its expertise and excellence in the design and manufacture of analytical, scientific, and physical testing, and medical equipment.

Kudos to a productive and seamless partnership! (//DDGotis, ITDI S&T Media Service; Photo credits to PTD)
